

Business Continuity Planning & Management

Cyberattacks, supplier failures, operational shutdowns and unexpected crises can bring critical activities to a standstill. This practical course helps participants assess business impact, establish recovery priorities and develop continuity strategies that protect people, systems, operations and supply chains. Participants learn how to build, test and improve a Business Continuity Plan aligned with organisational risks and ISO 22301 principles.

What You Will Learn

- Develop a Business Continuity Plan based on organisational risks.
- Identify critical functions through Business Impact Analysis.
- Define Recovery Time and Recovery Point Objectives.
- Assess risks across people, systems, operations and suppliers.
- Design practical recovery and crisis response strategies.
- Test and strengthen existing continuity arrangements.
- Align continuity planning with ISO 22301 principles.

Who Should Attend

- BCM Team Members & Coordinators
- Department Heads & Managers
- Risk, Security & Compliance Officers
- Internal Auditors
- IT & Disaster Recovery Specialists
- Operations & Facilities Managers
- HR & Administration Professionals
- Supply Chain & Procurement Managers
- Professionals responsible for operational resilience or crisis preparedness

Lead Trainer

Prince Lazar

Prince Lazar brings over 20 years of experience in crisis management, security risk planning and business continuity across Asia Pacific, the Middle East and Africa. His background spans military operations, corporate crisis response and operational resilience. He has advised Fortune 100 companies, embassies, NGOs and government entities on preparing for and responding to high-pressure disruptions. His scenario-driven approach helps participants translate continuity principles into practical plans and confident crisis response.
